Flashing $=44 \mathrm{ft}$
Step flashing $=186 \mathrm{ft}$
Parapets $=0 \mathrm{ft}$

Note: This diagram contains segment lengths (rounded to the nearest whole number) over 5.0 Feet. In some cases, segment labels have been removed for readability. Plus signs preface some numbers to avoid confusion when rotated (e.g. +6 and +9 ).

## PITCH DIAGRAM

Pitch values are shown in inches per foot, and arrows indicate slope direction. The predominant pitch on this roof is $6 / 12$

Note: This diagram contains labeled pitches for facet areas larger than 20.0 square feet. In some cases, pitch labels have been removed for readability. Blue shading indicates a pitch of $3 / 12$ and greater. Gray shading indicates flat, $1 / 12$ or $2 / 12$ pitches. If present, a value of "F" indicates a flat facet (no pitch).

## AREA DIAGRAM

Total Area $=6,204 \mathrm{sq} \mathrm{ft}$, with 87 facets.

Note: This diagram shows the square feet of each roof facet (rounded to the nearest Foot). The total area in square feet, at the top of this page, is based on the non-rounded values of each roof facet (rounded to the nearest square foot after being totaled).

Roof facets are labeled from smallest to largest (A to Z) for easy reference.

## PENETRATIONS NOTES DIAGRAM

Penetrations are labeled from smallest to largest for easy reference.
Total Penetrations = 17
Total Penetrations Perimeter $=56 \mathrm{ft}$

Total Penetrations Area $=19$ sq ft
Total Roof Area Less Penetrations $=6,185$ sq ft

Waste Calculation
NOTE: This waste calculation table is for asphalt shingle roofing applications. All values in table below only include roof areas of $3 / 12$ pitch or greater. For total measurements of all pitches, please refer to the Lengths, Areas, and Pitches section below.

Additional materials needed for ridge, hip, and starter lengths are not included in the above table. The provided suggested waste factor is intended to serve as a guide-actual waste percentages may differ based upon several variables that EagleView does not control. These waste factor variables include, but are not limited to, individual installation techniques, crew experiences, asphalt shingle material subtleties, and potential salvage from the site. Individual results may vary from the suggested waste factor that EagleView has provided. The suggested waste is not to replace or substitute for experience or judgment as to any given replacement or repair work.

| Perimeter (ft) | 2 | 2 | 4 | 10 |  |  |  |  |  |  |

Any measured penetration smaller than $3.0 \times 3.0$ Feet may need field verification. Accuracy is not guaranteed. The total penetration area is not subtracted from the total roof area.
